

Georgia Power will develop projects from the Renewable Energy Development Initiative (REDI) utility scale RFP on behalf of C& I customer participants, who will sign a 10-30 year contract. Participating customers will purchase the renewable facility production at a fixed Portfolio Price and receive Hourly Credit based on production from the PPA(s) ...

STATE OF GEORGIA. Public Service Commission. Jason Shaw, Chairman. Commissioners. Tim Echols, Vice-Chairman. Fitz Johnson. Lauren "Bubba" McDonald. Tricia Pridemore. ... Consumer Solar Information Portal . House Bill 57; Attorney General Carr Warns of Misleading Solar Power Offers; Quick links.

Use our residential solar adviser tool to explore considerations and estimated costs for a solar panel installation on your home. Get real life figures to help you determine the best solar program for you and your goals.

Neither Georgia Power nor the State of Georgia currently offer any incentives or rebates for residential solar installations. However, there is a federal investment tax credit available for 30%. We would recommend speaking with an accountant or CPA to ensure you can take advantage of it when you file your taxes the next year.

The Biden administration awarded \$156 million Monday to regional nonprofit Capital Good Fund to help residents of low-income communities in Atlanta, Decatur, and Savannah install solar panels on...

The value of the SRECs is that you get to claim that 50% or 100% of your electricity usage is represented by that amount of solar generation somewhere. It costs me an extra \$5 to \$7 per month. For that I get to send a "price signal" to Georgia Power ...

The solar installers Tesla and Palmetto Solar top our best solar companies in Georgia list. Tesla scored 4.6 out of 5 stars when reviewed against our methodology and scored points for its wide ...

Republican-backed community solar legislation failed to pass in the state Senate and House earlier this year. The proposals would have allowed small- and mid-scale developers to participate in a community solar program regulated by the state Public Service Commission and let them build small solar arrays on Georgia Power's turf.

Capital Good Fund has a new option for low and middle-income (LMI) homeowners in Georgia who want to save money on their utility bills and be part of the solar solution to climate change, but worry alternative energy is out of their financial reach. Here's how it works. What: Georgia BRIGHT is a solar leasing program. It is not an ownership ...

Solar roof, Murray Elementary School, Fort Stewart Solar power in Georgia on rooftops can provide 31% of all electricity used in Georgia. [1] Net metering is limited to 100 kW for non-residential consumers and 10 kW for residential consumers, up to 0.2% of previous years peak demand. Georgia was given an F for net metering. [2] [3] Georgia is not a Net Metering State.

Solar power options. If you use a solar panel system -- also called a photovoltaic or PV system -- to produce electricity, you buy less electricity from the utility company and enjoy the benefits of renewable energy. The Department of Energy says most homes with solar panels get at least 40% of their energy from solar; that varies by house.

Georgia Power's Community Solar program costs \$24.00 per 1 kilowatt (kW) block per month for eligible residential customers, and \$25.00 per 1 kW block/per month for eligible small business customers. You are eligible for one block, regardless of ...

Georgia's solar and storage market has taken off in recent years, landing it a top spot in SEIA's national solar rankings. During the 2024 session, an industry-supported decommissioning bill was passed after much collaboration and effort. Community solar is the next big piece of the puzzle that solar advocates have their sights set on to ...

This April, Capital Good Fund, as a lead applicant for the Georgia BRIGHT Communities initiative, was awarded \$156M from the EPA's Solar For All program, enabling us to empower low-income and disadvantaged communities across the state to join the clean energy revolution through rooftop solar into 2025.

Now everyone can use solar! From home installation or buy back programs, to workplace solutions or non-installation options, our goal is to make solar an option for every Georgia Power customer. Not sure what solution is right for you? Use our solar adviser tools to find the best solution for your sustainability goals.
