

Could a community solar program benefit Georgia Power customers?

Several solar industry insiders made a pitch to a Georgia House committee on Wednesday for the economic and environmental benefits of establishing a community solar program that allows Georgia Power customers to purchase electricity from small-scale solar developers.

Does Georgia Power offer solar?

From home installation and our buy back program, to non-installation options, our goal is to make solar an option for every Georgia Power customer. Learn more about our behind-the-meter solar programs, including the new Renewable and Nonrenewable Resources (RNR) program, and how to interconnect your system.

Is Georgia a good place to install solar panels?

Georgia has consistently been in the SEIA Top 10 for solar photovoltaic installations for the past 10 years, and our state has one of the largest voluntary solar portfolios in the country.

How can I support the development of solar power in Georgia?

Sign up now and get the opportunity to support the development of solar power in Georgia by subscribing to a portion of local solar farms. Every month you'll receive energy credits on your monthly bill based on the solar farm's production. Want to become a corporate sponsor? Help make renewable energy available to income-qualified customers.

Will Georgia Power build another 1,000 megawatts of solar energy?

Recently, state regulators approved Georgia Power's plans to build another 1,000 megawatts of solar energy capacity. Butler said the solar industry is seeking to expand the energy market in the most cost efficient way to deliver more power to the grid.

Will community solar drive down Georgia Power rates?

Proponents argue community solar would drive down rates overall at a time when the cost of being a Georgia Power customer is on the rise while boosting clean energy access to more Georgians. Photo contributed by Creative Solar
