

6 ???&#0183; MONTREAL, Canada -- HPQ Silicon Inc. ("HPQ" or the "Company") (OTCQB: HPQFF), a technology company specializing in the green engineering of silica and silicon ...

The US silicon battery material manufacturer Group14 wants to take over the German company Schmid Silicon. The battery specialist is mainly interested in a plant in Saxony in order to secure an important preliminary ...

A US battery material developer wants to set up in Germany to produce silicon anodes for electric car batteries on a gigawatt scale. The company in question is Graphenix Development Inc (GDI), a US company with a subsidiary in the Netherlands.

Idled since 2016, the silane factory will manufacture a necessary precursor for many energy storage applications including silicon batteries and solar panels. Long recognized as the manufacturing ...

The news: Group14 Technologies, a startup based in Woodinville, Wash., announced Monday it has acquired Germany's Schmid Silicon Technology Holding for an undisclosed sum. The company produces...

We are here to help your innovations set benchmarks for the next generation high performance batteries. Whether you're looking for a reliable and cost competitive source for your high volume SiNP demand or developing a cutting-edge silicon based anode, we ...

6 ???&#0183; MONTREAL, Canada -- HPQ Silicon Inc. ("HPQ" or the "Company") (OTCQB: HPQFF), a technology company specializing in the green engineering of silica and silicon-based materials is pleased to inform shareholders that on November 24, 2024, it signed a Memorandum of Understanding (MOU) with a company based in Northern Germany. This company ...

A US battery material developer wants to set up in Germany to produce silicon anodes for electric car batteries on a gigawatt scale. The company in question is Graphenix Development Inc (GDI), a US company ...

We are here to help your innovations set benchmarks for the next generation high performance batteries. Whether you're looking for a reliable and cost competitive source for your high volume SiNP demand or developing a cutting-edge ...

The acquisition marries Schmid Silicon's proven, ultra-high-purity, and low-carbon silane process technology with Group14's commercially proven manufacturing capabilities to deliver high-energy density silicon battery materials - a more sustainable and higher-performing alternative that pushes the boundaries of lithium-ion batteries to ...

A US battery start-up aims to begin producing a silicon precursor in Germany, as the company bets on rising demand from the country's car industry for technologies that cuts its reliance...

The US silicon battery material manufacturer Group14 wants to take over the German company Schmid Silicon. The battery specialist is mainly interested in a plant in Saxony in order to secure an important preliminary product. The takeover is said to be only the first step in its upcoming European expansion.

Idled since 2016, the silane factory will manufacture a necessary precursor for many energy storage applications including silicon batteries and solar panels. Long recognized as the manufacturing powerhouse of Europe, Germany is expected to surpass Japan to become the third-largest economy in the world this year.

Group14's vision to strengthen localized battery supply chains is aligned with Germany's commitment to building a robust clean energy economy. By securing local access to key silicon battery technology and materials, Group14 is bolstering the battery manufacturing landscape and expanding employment opportunities in the clean energy sector ...

Group14, a global manufacturer and supplier of advanced silicon battery technology, announced the commencement of Phase I of its European manufacturing roadmap by beginning preparations to restart operations at its newly acquired silane factory in Spreetal, Germany. (Earlier post.)
