

Families in Guadalcanal Province can now access a more resilient healthcare system powered by 24/7 solar energy, thanks to a partnership between Superfly Limited, the Good Samaritan Hospital and the Australian Government. The hospital's new solar-battery hybrid system was officially launched at Tetere's Good Samaritan Hospital.

A group of investment firms led by the Asian Development Bank (ADB) has partnered with the government of the Solomon Islands to finance new solar PV power plants, increase rooftop solar PV...

Overall, Noro's location in the Solomon Islands offers excellent potential for solar energy production year-round. With minimal seasonal variations and consistently high output, this tropical paradise is well-suited for solar PV installations.

Solar energy can help save you money on your electricity bill by replacing some of your consumption from the Solomon power grid. Solar power systems have no moving parts, are extremely reliable, and have a long expected life span. They are self-cleaning, easy to install and require very little in the way of maintenance.

Types of Solar Power Systems

ADB Approves \$15.2 Million Solar Project for Solomon Islands. ADB today approved financing to support the Government of Solomon Islands and Solomon Power to convert electricity networks in five provinces almost entirely to solar power.

Explore the solar photovoltaic (PV) potential across 2 locations in Solomon Islands, from Noro to Honiara. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine solar PV potential and identify the optimal panel tilt angles for these locations.
