

After we tested four generators in the 2,200-watt range, it was clear to us that the Honda EU2200i was the best. The Honda was the quietest, lightest, and most powerful generator we looked at--it ...

You are only going to be able to charge that from zero to full in under an hour if you charge it from the wall, not from solar panels. To charge it from full using panels in the least amount of time ...

Our verdict on solar generators. At the end of the day, choosing the best solar generator for you comes down to capabilities. In most cases, we recommend the Goal Zero Yeti 1000 Core for its ...

Here's our recommendation: if you plan to use the solar generator very often, a LiFePO4 solar generator will have a longer lifespan. But if you only plan to use the solar generator ...

We tested 19 solar generators -- large-capacity rechargeable power stations paired with a set of portable solar panels -- to find the best performing, most versatile devices that can provide ...

Good value: Instead of setting a hard price cap, we look at capacity (in watt-hours) per dollar. While prices can fluctuate, this approach helps us quantify the bang-for-your-buck factor using ...
