

At Gravitricity we have a dynamic and skilled team of highly capable individuals. Their real power is how they work as a team, get to the heart of engineering challenges and find optimal solutions. Each team member is aligned to our ambitious mission to accelerate the global transition to 100% renewable energy and cares passionately about the ...

At Gravitricity we are developing a novel storage technology which offers some of the best characteristics of lithium batteries and pumped storage. Ideally suited to network-constrained users and operators, distribution networks and major power users, the technology operates in the 1MW to 20 MW power range and enables existing grid ...

We're extremely excited to announce a major new collaboration between Gravitricity Ltd and ABB. The two companies have joined forces to explore how gravity energy storage technology can help ...

Edinburgh-based energy start-up Gravitricity has unveiled plans to transform disused mine shafts into hi-tech green energy generation facilities through a system that uses gravity and massive weights.

At Gravitricity we have a dynamic and skilled team of highly capable individuals. Their real power is how they work as a team, get to the heart of engineering challenges and find optimal solutions. Each team member is aligned to our ...

Gravitricity - Provider of gravity-based energy storage system. Raised a total funding of \$4.98M over 8 rounds from 30 investors. Valued at \$17.5M. Founded by Charlie Blair, Martin Wright and 1 other in the year 2011. Gravitricity has 5 competitors.
