

Does Greece have a plan for rooftop solar PV?

November 2023, Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables, from which 13.4 GW came from solar power capacity. However, there is no roadmap or strategy at this time in regards to rooftop solar PV in particular.

Is self-production a solution to Greece's energy crisis?

“Amidst the energy crisis, self-production is the only solution households or businesses have to be able to cope with the cost of electricity and protect themselves in an unstable environment,” Tzortzakakis said. With more than 250 days of sunshine per year, Greece is rich in renewable solar energy potential.

What impedes solar development in Greece?

Currently, probably the main reason that impedes solar development and that makes administrative procedures long and burdensome in Greece, including rooftop solar, is grid availability. In many areas, applications for solar rooftop PV are being rejected due to lack of electricity grid capacity.

How many active energy communities are there in Greece?

Active Energy Communities: Greece is a frontrunner, when it comes to the community energy movement, with an establishment of over 1,600 active energy communities since August 2023.

Who is eco//Sun?
