

The Longi HiMo 6 Explorer V2 LR5-72HTH 575W Mono Crystalline Solar Panel is a high-performance solar module with 144 half-cut cells, ideal for both isolated photovoltaic installations and grid-connected systems.

Under the mission of "To make the best of solar energy to build a green world" with a brand positioning of "The most trusted, reliable solar company that blazes the trail for green technology," LONGi is developing solutions for large-scale power plants, for different industries and households with its innovation-focused development.

LONGi's Hi-MO 5m panels are designed for residential solar systems, while the larger Hi-MO 5 panels are ideal for commercial and industrial installations. These panels use monocrystalline PERC cells with multi-busbar (MBB) half-cut cells, gallium-doped silicon, and smart soldering technology for enhanced performance and durability.

Introducing the Longi Hi-MO 6 Solar Panel - where innovation meets sustainability to redefine solar energy solutions. As the demand for clean and efficient power generation continues to rise, the Longi Hi-MO 6 stands at the ...

LONGi has unveiled the Hi-MO 6, its latest generation of photovoltaic modules that match high efficiency with stunning aesthetics for distributed generation and rooftop applications.

The Marvelous HiMo-6 Solar Panel. Imagine a solar panel that's efficient and budget-friendly while maintaining a sleek profile. That's the LONGi HiMo-6 for you! Double the Efficiency at the Same Size. The HiMo-6 boasts remarkable efficiency, delivering double the power of conventional panels of the same size. Back Contact Brilliance

The LONGI HIMO6 photovoltaic panel is designed to maximize light absorption without any shading given by the bus bar on the front face of the panel. This allows for better performance ...

The LONGI HIMO6 photovoltaic panel is designed to maximize light absorption without any shading given by the bus bar on the front face of the panel. This allows for better performance under conditions of high temperature, low irradiation, and higher energy gain.
