

The Guam Power Authority (GPA) has received its third consecutive Smart Energy Provider (SEP) designation from the American Public Power Association (APPA) for its excellence in energy efficiency, distributed generation, and environmental initiatives.

The Guam Power Authority earned a Smart Energy Provider designation from the American Public Power Association for demonstrating a commitment to and proficiency in energy efficiency,...

Along with the transition to island-wide use of renewable energy, GPA is partnering with the Guam Energy Office (GEO), Guam Housing and Urban Renewal Authority (GHURA) and other community partners to increase the number of households to ...

Along with the transition to island-wide use of renewable energy, GPA is partnering with the Guam Energy Office (GEO), Guam Housing and Urban Renewal Authority (GHURA) and other community partners to increase the number of households to use renewable energy to 80% in ...

In August 2024, a group of Guam energy stakeholders and government leaders gathered to take another step toward a future in which the U.S. territory transitions to 100% renewable energy by 2045. The stakes are high. Guam is primarily powered by expensive, imported fuel oil.

GPA grid to operate with 100% renewable energy. Smart Grid (SG) - Advanced technology for getting the right information to the right people or systems at the right time to make the right strategic and operational decisions. Energy Efficiency - Energy efficiency has a much higher rate of return than just simply installing solar PV.

"We are honored to be recognized as a utility at the cutting edge of smart energy best practices," said John M. Benavente, P.E. GPA General Manager. "This SEP designation represents our dedication to offering programs that help our customers save money, reduce our collective
