FREE UK SHIPPING! SHOP TODAY Protect Your Property With Our Window Film Installation Company based in County Durham, covering the whole of the UK. Solar Control provides a premium installation service for professional window film in residential and commercial properties.

Who makes solar control glass in the UK?

There are two main manufacturers of solar control glass in the UK right now: Saint-Gobain and Pilkington. In terms of effectiveness, it is difficult to find a difference between the two, and both offer products with a tinted, mirrored or clear appearance.

Is solar control glass a good option?

Currently, solar control glass is available as clear glass, tinted in a variety of tones, or with a mirror finish, and is inarguably effective at what it is intended to do. However, cost may be an issue. Meeting current Building Regulations is highly likely to require Low-E glass as a minimum.

Is solar control window film worth it?

To get a complete understanding of the cost and value of solar control window film, it's also important to fully understand the benefits that an application of film delivers. For example, by reducing the internal temperature, the reliance on expensive air conditioning is also lessened, in turn cutting energy costs.

How much does a double glazed solar system cost?

A double-glazed unit with Low-E glass is likely to cost under £50/m², while that same unit with an outer pane of solar control glass is likely to cost in excess of £130/m². As for the retrofitter, this cannot be considered a DIY job, as the pane has to be incorporated into a double-glazed unit, with that unit then being fitted into a frame.

What kind of inverter does GoSolar use?

GoSolar uses high efficiency low cost \$/watt micro-inverters by NEP(TM). Founded in 2010 in Silicon Valley California, NEP(TM) engineers and produces competitively priced high-quality micro inverters. In fact, the NEP(TM) micro inverter is the only certified and commercially available micro inverter in Japan.

Our Solar & Rechargeable Battery Systems not only shield you from escalating energy costs but also store solar energy in a backup battery. This ensures that during power outages, your lights remain on, your food stays fresh, and you can relax knowing that your energy needs are covered.

A solar power purchase agreement provides a commercial building owner the opportunity to go solar without any upfront costs or future maintenance of a photovoltaic system. Under a solar power purchase agreement the commercial building owner will only pay less per month on their monthly electric bill!

I've been told by a glazing company that fitting solar control glazing instead of clear will triple the cost of the glass (window frame cost excluded). Does this sound correct? This is for 2 large south facing full height windows in a loft that I don't want to turn into an oven.
