Joju Solar are designers and installers of renewable energy systems. We specialise in solar PV, battery storage and electric vehicle chargers. Our mission is, and always has been, to help people reduce their carbon emissions. Founded in 2006, we are one of the longest-standing and most trusted solar companies in the UK.

Joju Solar worked with my wish list and presented the practical answer. Able to answer all technical questions. Their Project Manager then worked with us enabling late specification changes to be achieved. From start to finish we knew where we were and what was possible. All the roofers and electricians took pride in their work.

The Zappi EV charger is the first of its kind, smartly diverting excess solar electricity directly into your car. The exported electricity from a typical domestic solar roof could run a Nissan Leaf for a whopping 5000 miles! Cost: From £400+VAT. Benefit: Up to 5000 miles per year from a typical 3kWp solar roof.

The cost of a solar roof is all up front, so it takes some time for the financial benefits to recoup the initial outlay - this is called the payback period. For a residential solar roof, the payback period ...
