

What are the energy storage options for photovoltaics?

This review paper sets out the range of energy storage options for photovoltaics including both electrical and thermal energy storage systems. The integration of PV and energy storage in smart buildings and outlines the role of energy storage for PV in the context of future energy storage options.

Can energy storage systems reduce the cost and optimisation of photovoltaics?

The cost and optimisation of PV can be reduced with the integration of load management and energy storage systems. This review paper sets out the range of energy storage options for photovoltaics including both electrical and thermal energy storage systems.

How will energy storage affect the future of PV?

The potential and the role of energy storage for PV and future energy development Incentives from supporting policies, such as feed-in-tariff and net-metering, will gradually phase out with rapid increase installation decreasing cost of PV modules and the PV intermittency problem.

What is global solar PV capacity & annual addition?

Global solar PV capacity and annual addition . Solar PV is the most popular renewable energy resource in residential sector. A solar PV system in a grid-connected system would supply the load and export the extra power to the main grid with an feed-in-tariff (FIT).

Why is PV technology integrated with energy storage important?

PV technology integrated with energy storage is necessary to store excess PV power generated for later use when required. Energy storage can help power networks withstand peaks in demand allowing transmission and distribution grids to operate efficiently.

Can PV and energy storage be integrated in smart buildings?

The integration of PV and energy storage in smart buildings and outlines the role of energy storage for PV in the context of future energy storage options. The authors would like to acknowledge the European Union's Horizon 2020 research and innovation programme under grant agreement No. 657466 (INPATH-TES) and the ERC starter grant No. 639760.
