

How much does energy cost in Guadeloupe?

Energy Snapshot Guadeloupe This profile provides a snapshot of the energy landscape of Guadeloupe, an overseas region of France located in the eastern Caribbean Sea. Guadeloupe's utility rates are approximately \$0.18 U.S. dollars (USD) per kilowatt-hour (kWh), below the Caribbean regional average of \$0.33 USD/kWh.

Does Guadeloupe rely on imported fuels?

Nevertheless, Guadeloupe's reliance on imported fossil fuels--more than half of the island's electricity is generated from imported petroleum-based fuels--leaves it vulnerable to significant disruptions in shipping or the availability of import facilities.

What does a CTO do at habitat energy?

As CTO Richard is responsible for leading the strategic development of our technology and trading tools to ensure we continue to deliver market-leading optimisation services to our clients globally. By 2033, according to the new PPE, the local share of electricity production should reach 50 to 75%, leaving Guadeloupe still dependent on imported energy, in particular liquid and solid biomass. A proportion which increases mathematically by including greenhouse gas emissions linked to the transport of these biomasses by boat.
