

Who is harness energy?

Sustainable energy for the 21st century and beyond. Harness Energy specialise in sustainable energy projects. Get social with us! Share your thoughts! Continuing to invest in developing our future based on fossil fuels is an ineffective use of our finite resources.

What makes harness energy a good company?

Plus, they are just really nice people who are great to work with. Harness Energy is dedicated to enabling the collection of reliable data throughout the project lifecycle, from resource assessment to operational monitoring.

Why should you choose harness for your wind & solar project?

The team at Harness has always been very professional, paying attention to, and managing, every detail across our wind and solar feasibility projects. They are pioneers in the industry, and have been our key global partner, successfully completing the first-ever wind resource mapping of for the country of Bangladesh.

Why should you choose harness?

Harness provides simple installation and worry-free ongoing maintenance. Powerful insights begin with reliable measurements, collecting bankable wind and solar data requires an approach that is customized to your unique situation. Contact us today to harness your potential.

Wind power in Belarus is a form of renewable energy, which with solar power, is one of the most important sector of renewable energy in Belarus, but remains underutilized as of 2021. As of 2019, there is one 106 MW wind farm.

Continuing to invest in developing our future based on fossil fuels is an ineffective use of our finite resources. It is time for us to evolve and leave behind the era of fossil fuels and invest in technologies that derive energy from sustainable sources

Increased deployment of renewable energy technology in Belarus would contribute to the country's GDP and economic growth, enhance energy security by reducing import dependence, and contribute towards local value creation, including employment opportunities and industrial development.

Harness Energy is a leading provider of meteorological observation and monitoring solutions. We work with utility scale power producers, research organizations, and government entities around the world to make sure they have the information they need to build a cleaner future.
