Puerto Rico has begun using batteries connected to residents' rooftop solar panels to provide backup power for its grid, helping prevent blackouts and offering an alternative to fossil fuel-burning peaker plants. It could be the first step toward building one of the largest virtual power plants of its kind.

Check out the Solar Batteries section to evaluate and compare different technology options. Once you've found the solar battery you'd like to install on your property, register for the EnergySage Marketplace and indicate which battery you'd like to be quoted.

The project is expected to create a 400-megawatt solar array, generating roughly 876,000 megawatt hours (MWh) of electricity annually, enough to power more than 65,000 homes during daylight hours. Its 800-MWh battery will store electricity for after the sun sets, reducing the need for natural gas-fired generators.
