A high-capacity battery, as the name suggests, is designed to store a significantly larger amount of energy compared to standard batteries. This increased capacity means that these batteries can power devices for longer periods before needing to be recharged.

This 110V AC power pack comes with a 24V 12Ah (288 Watt-hour) super high capacity rechargeable lithium ion battery and a 300W power inverter that converts the battery power to a 110V AC power just like the power source in a wall outlet.

We've already reached a limit where lithium ion batteries can't be any more optimized than what the OG iPhone SE has, especially from cheap no-name Chinese manufacturers. To get higher battery capacity, the battery must be physically larger. At best, a fake "high capacity" battery will work as well as an original 1624 mAh one.

High-capacity batteries for home use can keep your lights on, your fridge running, and your devices powered up when the grid goes down. There's a wealth of home backup power solutions out there, so let's help you choose one that fits your needs.
