

The St Kitts facility to be comprised of 37.5MW solar PV and a 14.8MW/45.7MWh lithium-ion battery energy storage system is a major development for the nation and a landmark for the region. When completed, it will be the largest solar + storage operation in the Caribbean.

The project will use an advanced renewable energy microgrid, with SYG TECH's innovative Vertical Axis Wind Turbine at its core, designed specifically to handle the extreme weather of hurricane-prone areas like Saint Kitts and Nevis.

Swiss energy storage firm Leclanché has broken area on a US\$70 million solar and storage microgrid project in St Kitts and Nevis. The system is expected to include a 35.7MW solar farm and a 14.8MW lithium-ion battery energy area system (BESS).

The timing has never been better for your Saint Kitts and Nevis resort or business to consider renewable solar, wind, and microgrid energy. Not only can Solar Island Energy save your company time, money, and energy by engineering ...
