

What is ATS & how does it work?

ATS is the world's first and only solution for industrial waste heat--without a single moving part. It is a sustainable (99% circular) and cost-effective solution that produces electricity directly from waste heat. For 200 years we've used turbines. ATS' solid-state solution represents a paradigm shift in how heat can be managed.

Is ATS a sustainable solution?

It is a sustainable(99% circular) and cost-effective solution that produces electricity directly from waste heat. For 200 years we've used turbines. ATS' solid-state solution represents a paradigm shift in how heat can be managed. The impact potential is gigatonnes,spanning industries and the world.

What is ATS' solid-state solution?

ATS' solid-state solution represents a paradigm shift in how heat can be managed. The impact potential is gigatonnes,spanning industries and the world. We are radically redefining what's possible to fix the climate. On average,60% of the energy to power the world's industrial plants (cement,steel,chemicals) is lost as waste heat.

Advanced Thermovoltaic Systems (ATS) is revolutionizing the way industries manage waste heat, providing the world's first and only solid-state solution that converts industrial waste heat into clean, sustainable electricity without the need for turbines or moving parts.

WINNER: Advanced Thermovoltaic Systems (ATS) Around 60% of the energy used to power industries is lost as waste heat. Led by CEO Kelly Adams, US-based ATS has developed a scalable technology to capture ...

Advanced Thermovoltaic Systems (ATS) integrates cutting-edge security measures into our modular solid-state systems. From robust controls design to cyber security certification, tamper monitoring ...

Formerly Known As. Berken Energy, Berken Solar. Ownership Status. Privately Held (backing) Financing Status. Venture Capital-Backed. ... Advanced Thermovoltaic Systems's primary industry is Other Equipment. Is Advanced Thermovoltaic Systems a private or ...

ATS is the world's first and only solution for industrial waste heat--without a single moving part. It is a sustainable (99% circular) and cost-effective solution . that produces electricity directly from waste heat. For 200 years we've used turbines. ATS" solid-state solution represents a paradigm shift in how heat can be managed.

"At ATS, we are proud to lead the way in converting this waste into clean, usable electricity. Winning the 2024 Earthshot Prize underscores the transformative potential of our technology. Tonight is a key moment for us as we focus on scaling up production in larger manufacturing facilities," Kelly Adams, CEO, Advanced Thermovoltaic Systems.

The highly qualified and experienced team of professionals steering Advanced Thermovoltaics on the road to sustainable heat to power and creating a cleaner environment. ... ATS's mission driven leader. 20+ years of first-of-a-kind project delivery in telecommunications, energy, and industrial sectors. ... &#169;2024 by Advanced Thermovoltaic ...

Advanced Thermovoltaics Systems, turning Industrial Waste Heat directly into Sustainable Electricity. Lower operating costs while reducing your carbon footprint. ats.energy. top of page. Home. Media. Press. Team. Contact. More ... &#169;2024 by Advanced Thermovoltaic Systems Corp.

Advanced Thermovoltaic Systems (ATS) has developed a simple, safe, and scalable technology to capture waste heat and convert it into electricity, offering a game-changing solution for heavy industries like cement and steel production.

When was the last funding round for Advanced Thermovoltaic Systems? Advanced Thermovoltaic Systems closed its last funding round on Apr 22, 2022 from a Seed round. Who are Advanced Thermovoltaic Systems 's competitors? Alternatives and possible competitors to Advanced Thermovoltaic Systems may include Enphase Energy, Thermondo, and Aquion Energy.

Initially investigating advanced materials the company could use for solar panels, the Advanced Thermovoltaic Systems (ATS) team realised that its panels could generate electricity without light, only requiring waste ambient heat.

Advanced Thermovoltaic Systems (ATS) is revolutionizing the way industries manage waste heat, providing the world's first and only solid-state solution that converts industrial waste heat into clean, sustainable electricity without the need for turbines or moving parts. ATS offers a 99% circular, scalable, cost-effective, and revenue-positive ...

One of the 20 winners was the Advanced Thermovoltaic Systems (ATS) team, including Jake Perez, a RASEI alum. The ATS team was awarded the distinguished 2024 Earthshot "Fix Our Climate" prize for their transformative efforts against climate change. Chosen from 5,342 nominations across 141countries, this prestigious award was recently ...

WINNER: Advanced Thermovoltaic Systems (ATS) Around 60% of the energy used to power industries is lost as waste heat. Led by CEO Kelly Adams, US-based ATS has developed a scalable technology to capture waste heat from industry and turn it into electricity for the hard-to-abate sectors, such as cement and steel

production.

ATS is the world's first and only solution for industrial waste heat--without a single moving part. It is a sustainable (99% circular) and cost-effective solution . that produces electricity directly from waste heat. For 200 years we've used ...

Canadian-based Advanced Thermovoltaic Systems (ATS) was recognised for its technology to capture and convert industrial waste heat into sustainable electricity without the need for moving parts. It won the "Fix Our Climate" Prize at this year's Earthshot Awards Ceremony, held last week in Cape Town, South Africa.
