

How much energy does Honduras use?

The total primary energy offer in Honduras is around 4.62 Mtoe or 53,730.6 GWh. The main source of primary energy is petroleum (53%) followed by combustible renewable and waste (44%), and coal (3%). The residential energy consumption is around 47% of the national consumption, of which 86% are provided by biomass, primarily firewood.

Does Honduras need a new infrastructure?

However, national renewable energy and sustainable development ambitions in Honduras face important infrastructure constraints. For example, significant investment is needed to enhance the quality of energy and water services, including improvements in coverage and connectivity.

Why should Honduras invest in energy resources?

The population of Honduras suffering from poverty will be directly benefited by the resources generated by promoting the best use of the country's energy resources and the proper positioning of government resources. Additionally, this would reduce conflicts in the installation of generation and T&D plants, which results in lower electricity costs.

Does Honduras use biomass?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Honduras: How much of the country's energy comes from nuclear power?

How will energy deficiency affect the population of Honduras?

The Honduran population will have a better availability of reliable data on energy deficiency. The population of Honduras suffering from poverty will be directly benefited by the resources generated by promoting the best use of the country's energy resources and the proper positioning of government resources.

Why is firewood a major source of energy in Honduras?

boasts a fast reduction of this resource in Honduras. The poverty of the population, the access to other energy sources, as well as the country's rural population density, determines the usage of firewood as a main source of energy in Honduras.

Honduras: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...
