The company also invests in green energy businesses including solar and wind power generation.

What does CITIC Pacific do?

The company also invests in green energy businesses including solar and wind power generation. CITIC Pacific is the shareholder and strategic partner of V-Power Group (1608.HK).

Will HKSAR start generating green electricity in 2025?

Veolia, Sun Hung Kai Properties (SHKP), and CITIC Pacific today held a groundbreaking ceremony for the city's first privately funded solar farm on a landfill, marking a significant step in the HKSAR Government's Climate Action Plan 2050. The project is targeted to start generating green electricity in the first half of 2025.

Does CITIC Pacific own a wind farm in Tianjin?

In Tianjin, we built and currently operate a 20MW PV power plant. In 2017, CITIC Pacific and ITOCHU acquired a 22.5% equity interest in an offshore wind farm in Germany on the North Sea that has 80 3.6MW wind turbines and a total installed capacity of 288MW.

What role did Citi play in a data center project?

Citi played multiple roles in the project, with Citi's Asset Finance Group providing loan financing to a third-party investment company to effectively fund the project through normal operating expenses rather than capital expenditure. Citi Realty Services, the data center user, was therefore not required to provide the upfront investment costs.

How did Citi finance the new markets project?

Citi's financing for the project was structured through the New Markets Tax Credit Program, a federal initiative designed to spur private investment in support of low-income communities.
