

What is Longi high-efficiency solar module?

LONGi High-efficiency solar Module, widely adopting PERC solar cells technology, Half-cut Module Technology and Bifacial PV technology, Mono Silicon Crystalline Technology has become a leading manufacturer and brand in the export and installation of monocrystalline silicon solar photovoltaic module.

Why should you choose LONGi Solar panels?

High efficiency modules supplied by LONGi have been applied widely across the globe from grassland on high lands, deserts, water ponds to households. The solar modules benefit customers and local economies with high value advantages of greater efficiency, lower light degradation and higher reliabilities.

Are LONGi Solar & Trina Solar the same company?

LONGi Solar and Trina Solar are both tier 1 solar panel manufacturers and are considered very reputable companies in the solar industry. However, when you compare between two specific models, one from each manufacturer, you can spot the differences and make an educated decision on which solar panel to choose for your project.

How big is a solar panel?

The solar panel has a length of 1,762 mm and a width of 994 mm. The panel weighs 19 kg and is 35 mm thick. The solar frame can withstand snow load of up to 5,400 Pa on the front and wind loads of up to 2,400 Pa on the rear side. The cell orientation is 6 parallel and 2 series.

What is the maximum system voltage in LONGi Solar?

The maximum system voltage for LONGi Solar is 1,500 Vdc, compared to 1,000 Vdc for QCells. Both LONGi Solar and QCells are tier 1 manufacturers, with LONGi Solar having a higher maximum system voltage.

Are LONGi Solar and QCells the same company?

LONGi Solar and QCells are two different companies in the solar industry, both of which are considered tier 1 and reputable.

There's a LONGi solar panel for everyone. Hi-MO 5 Series. LONGi's Hi-MO 5m panels are made for solar systems on the roofs of houses, while the bigger Hi-MO 5 panels are for businesses and big solar projects. These panels are similar to ...

Photovoltaic panels 460W - Longi Hi-MO 4m LR4-72HBD 440-460M The Longi Hi-MO 4m LR4-72HBD photovoltaic panel is a high-performance module designed for large-scale commercial and utility applications. With a power ...

For example, a LONGi Solar panel rated at 360 W will be able to operate anywhere from 360 W to 365 W (or 5 watts higher than 360) under STC. Temperature Coefficient P_{Max}: -0.37. Solar panels perform best at 77°F (25°C).

Up to 550Wp per module is an exciting time to be in solar, but this improved Watt-class results from new era 182mm wafers (10% larger than Hi-MO 4; 166mm) that increase the module dimensions up to 2256x1133mm. ...

The LONGI HIMO6 photovoltaic panel is designed to maximize light absorption without any shading given by the bus bar on the front face of the panel. This allows for better performance ...

This Longi 555-watt solar panel in Pakistan has an efficiency of 21.7%. This Chinese company is also making Bifacial solar panels and these types of panels are also available in Pakistan. Its ...

35mm Frame: The 35mm frame refers to the thickness of the frame surrounding the solar panels. This frame provides structural support and protection to the panels, ensuring their durability and longevity. ... Solar ...

The Longi 555W Solar Panel is a powerhouse among solar panels, offering exceptional efficiency. Discover top-tier Longi 555W Hi-MO5 solar panels with Mono PERC technology and MC4 connectors for superior efficiency and easy ...

The vast majority of solar panel manufacturers use boron-doped P-type silicon wafers, which results in a performance warranty of around 82 to 83% retained power after 25 years of use. With the increased stability of ...

The panel weighs 19 kg and is 35 mm thick. The solar frame can withstand snow load of up to 5,400 Pa on the front and wind loads of up to 2,400 Pa on the rear side. ... The solar panel from Trina has a higher maximum power rating than ...

The only useful thing that we get from this is depth or height (panel thickness): Most solar panels are about 1.5 inches thick. ... A typical 400-watt solar panel is 79.1 inches long and 39.1 inches wide. It takes up 21.53 sq ft of area. If you ...

Photovoltaic panels 600W - Longi Hi-MO 6 Scientist LR5-72HTH 580-600M-V03 DG Longi Hi-MO 6 Scientist LR5-72HTH 580-600M-V03 DG is a high-efficiency photovoltaic panel designed for commercial and utility-scale solar projects. ...
