

How to deal with stains on photovoltaic panels

How do you remove mineral stains from solar panels?

For mineral deposits, try using a 1:1 white vinegar and water solution to help gently lift and remove the stain. If you try these methods and you are still left with stains, it's best to consult with a professional. Cleaning your solar panels is an important part of ensuring that they continue to work at their best.

Can high-pressure cleaning damage solar panels?

High-pressure cleaning can cause irreversible damage to solar panels that could impact the performance of the system. An alternative to high-pressure water or abrasive materials is using a soft brush or sponge with mild soap and water.

How do you clean a solar panel?

Just be sure to rinse the panels with water afterward. Specialty solutions: A solar panel-specific cleaning solution can help you tackle almost any dirt or debris. Pressure wash: Low-pressure washers can tackle deep-rooted grime when other methods don't cut it. Avoid high pressure washers, which can cause damage to your solar panels.

How do I know if my solar panels need cleaning?

When you see visible dirt, grime or vegetation build-up, act quickly to clean your panels. Monitoring your solar panel output can also help you identify when they need cleaning. For example, a rapid drop in yield can indicate that your panels have become dirty.

Should I Turn Off my solar panels before cleaning them?

Yes, you should turn off your solar panels, and any adjoining electrical equipment, before attempting to clean them. While solar panels are built to withstand the harsh Aussie climate, if you're hosing your panels down some water may get on the underside of the panel, which could potentially cause issues and damage if you're not careful.

Should you clean solar panels without feet firmly planted?

Never clean solar panels without your feet firmly planted on a stable surface. While cleaning, it's crucial to avoid damaging any electrical components, as this could make the solar panels less effective or disrupt their operation altogether. Always weigh the safety risks and benefits before cleaning your solar panels.
