Why should you buy high-quality solar panels?

Buying quality solar panels built by reputable companies like the high-quality EcoFlow solar panels and having your equipment installed by certified professionals will help ensure that the need for repairs is kept to a minimum. EcoFlow is a portable power and renewable energy solutions company.

What should I do if my solar panels are damaged?

Regularly inspect your solar panels for damage. Keep tree and bush branches away from your solar panels. Doing so may mean pruning trees and bushes or removing them if they become too large. Regularly clean your panels or have a professional service perform the task. Have regular professional whole-system inspections.

What happens if a solar panel degrades?

When a solar panel degrades, it loses some of its ability to generate electricity. The amount of power that is lost depends on the extent of the degradation. In some cases, the loss of power may be barely noticeable. In other cases, the loss of power can be significant. There are a few different ways to repair broken solar panels.

What happens if a solar panel goes bad?

If left unaddressed, degradation can significantly impact the energy production of your solar panel system. One common cause of degradation is prolonged exposure to harsh weather conditions such as hail, extreme temperatures, or high winds.

What if my solar panels are under warranty?

Warranty Coverage: If your solar panels are still under warranty and you suspect a defect or performance issue, contact the manufacturer or installer for assistance. They can guide you through the warranty claim process and provide necessary repairs or replacements.
