

How to install Yingrui photovoltaic panels

Who is covered by the Yingli solar installation manual?

This manual applies to photovoltaic modules ("PV modules", also commonly known as solar panels) manufactured by Yingli Energy Development Company Limited ("Yingli Solar"), and is explicitly written for qualified professionals ("Installer" or "Installers"), including without limitation licensed electricians and RAL Certified PV Installers.

Do Yingli Solar PV modules corrode?

Although some types of Yingli Solar PV modules have passed the IEC 61701 salt-mist corrosion test with a salt concentration of 5% by weight, galvanic corrosion can occur between the aluminum frame of the PV module and installation or grounding hardware if such hardware is comprised of dissimilar metals.

Where should Yingli Solar PV modules be mounted?

Yingli Solar PV modules must be mounted on appropriate installation structures positioned on suitable buildings, the ground, or other structures suitable for PV modules (e.g. carports, building facades or PV trackers). PV modules must not be mounted on moving vehicles of any kind.

What is included in the Yingli Solar PV module manual?

This manual contains important information pertaining to the electrical and mechanical installation and maintenance of PV modules, and contains safety information that you must read carefully and be familiar with before handling, installing, and/or maintaining Yingli Solar PV modules.

What angle should Yingli solar panels be mounted?

Yingli Solar recommends that PV modules be mounted at a minimum tilt angle of 10 degrees to allow for proper self-cleaning from normal rain showers. Partial or complete shading of a PV module or modules can significantly reduce system performance.

What are Yingli Solar PV modules rated for?

Yingli Solar PV modules are designed to meet the requirements for the standards IEC 61215 and IEC 61730, application class A. Modules rated for use in this application class may be used in systems operating at greater than 50 V DC or 240 W, where general contact access is anticipated.
