

# How to install the plastic box of photovoltaic bracket

Why should you install a solar panel bracket?

The purpose of installing the bracket is to better fix the solar panel. If there is a more convenient and feasible method to fix the solar panel, PVMars will definitely recommend it to you, and effective solutions are based on solar panels' characteristics and your on-site installation environment.

How do I Mount my solar panels?

Depending on various factors, your solar panel mounting process might differ slightly. For this guide, we use the EcoFlow Tilt Mount Bracket for EcoFlow 400W Rigid Solar Panel as an example. Make sure to consult your equipment manuals before proceeding to install your panels.

What is solar panel mounting & racking?

What is Solar Panel Mounting and Racking? Mounting solar panels refers to the process of installing solar energy systems onto a structure such as a building or ground mount. The procedure usually involves securing the panels with a racking system on the rooftop or ground and connecting the system to the power grid.

How do you attach solar panels to a wooden frame?

You'll need clips or battens to attach solar modules to a wooden frame. As you can see, different materials come with different benefits and drawbacks. Which choice is right for you can depend greatly on your budget, environment, and where you want to mount the array. There are multiple options for mounting your solar panels.

How do I install rigid solar panels on my roof?

EcoFlow's rigid solar panels come with a EcoFlow Tilt Mount Bracket for easy rooftop installation. The components include four fixing brackets, two adjustable brackets, and screws. This should be all you need to mount rigid solar panels on the roof or any other flat surface on your home that receives direct sunlight.

How do you attach a solar panel to a wall?

Mark where you want to attach your triangle brackets to the wall. Use a tape measure to make sure they're installed as far apart as your solar panel is wide. Screw the brackets to the wall, using a level to make sure they're vertical. I used two screws per bracket -- one at the top and bottom of the vertical side. Here's a video of this step:
