Should you lease solar panels?

Thankfully, most leases include a 'power production guarantee', which means if your panels don't produce a certain amount of power, you'll pay less for your monthly lease payment. Although solar leases make panels more accessible by removing the upfront costs, users aren't able to save as much as they would if they buy the panels outright.

Should you lease solar panels if you're moving to a new home?

Customers who choose to lease solar panels may find themselves in circumstances where they want to end their lease, such as if they are moving to a new home or they find that the lease payments plus electricity from the grid -- if their system wasn't sized properly -- end up costing them more.

Can you move solar panels if you buy a house?

If you decide to move, your options may include transferring the lease and payments to the buyer of your home, moving the solar panel system to your new home, or paying to remove the solar panels from your roof. By leasing solar panels, you replace your monthly utility bill with a monthly equipment lease payment and pay no cash up front.
