How to wrap lines on WeChat webpage

How to add a line break in WeChat?

Select the cog icon to access settings. Select Chat and toggle Press Enter to Send switch to the Off position. Now when you hit the Enter button or key, it will add a line break instead of just sending the message. To send the message you will have to hit Send instead. Now that's sorted, let us make WeChat even easier to use!

Can I add a WeChat widget to my website?

To encourage customers to send you the first message,you can add a WeChat widget to your website. However,unlike other channels,WeChat does not support the click-to-chat links feature on the WeChat Official Accounts Platforms. The only way customers can reach out on your web chat widget is through QR codes.

What is the WeChat API?

The WeChat API allows your website to communicate with the WeChat platform. You can obtain the API credentials by logging into your WeChat Official Account and accessing the Developer Center. Follow the API documentation and guidelines to ensure a smooth integration process.

How to start WeChat app using a URL?

There's no wayto start wechat app using an URL or from an external web browser. weixin://is used by wechat only inside its web browser,for example to start the payment process and this type of URL's are meaningless outside of wechat.

How do I install a WeChat API Plugin?

Choose the appropriate plugin based on your website platform and requirements. Once you have the API credentials, you need to install the WeChat API on your website's server. The API credentials include an app ID, app secret, and token, which are necessary for authentication and communication with the WeChat platform.

How do I integrate Wechat on my website?

Before you can integrate WeChat on your website, you need to create a WeChat Official Account. This account acts as the official representation of your business on WeChat and is necessary for API access. To register for a WeChat Official Account, visit the WeChat Official Account Registration page.
