

Human-shaped bracket for solar street lights

How much weight can a solar light mounting bracket hold?

Install light poles with a minimum size of 1.5 inches and a maximum size of 3.5 inches. Please note that the thickness is 0.5mm. The solar mounting bracket can hold up to 150 pounds. The solar light mounting bracket is used in outdoor lighting, we do not recommend you install other products more than 150 pounds. DURABLE MATERIAL AND IS TO INSTALL.

Do solar lights need brackets?

Brackets are almost always required for solar lighting installations. This is because the solar is almost always mounted to the top of the pole and the fixture needs to be mounted lower on the pole. The fixture bracket allows the fixture to mount directly to the same pole and out away from the pole at times.

What makes up a commercial solar street light?

The components that make up a commercial solar street light are similar to other commercial solar lights. Each light consists of a solar power array, battery backup, DC light fixture, controller, fixture bracket, and a pole.

What is a solar street light fixture?

A solar street light fixture is a particular fixture that operates off DC power. Most manufacturers have their line of fixtures and do not work with fixtures outside their main line. This is because extensive testing has been completed, and warranties exist for all components.

What size poles do I need for a solar light system?

The poles provided for standard light applications are quite different from what is provided for a solar lighting system. Solar poles are typically very large, with a 4-6" tip and an 8-14" base, and should always be round. Square poles do not allow for mounting the solar and fixture in any direction and tie you to four direction orientations.

What is a solar street light & parking lot?

Solar Lighting International's All-In-One solar street and parking lot and street light provides multiple programming options. Standard features are a standard dusk-to-dawn solar lighting option without dimming, optional adjustable timed control mode, and motion-activated human body sensor mode via our dual sensor technology.
