

Does IKEA offer 100% renewable electricity?

Today, IKEA announces a program with the intention of securing 100% renewable electricity at direct suppliers - especially in markets where it's difficult to access renewable electricity now. Almost two-thirds of the IKEA climate footprint is directly connected to the supply chain, including production at suppliers.

What is home solar with IKEA?

Home Solar with IKEA combines the strengths of IKEA retail and knowledge of life at home with the expertise of SunPower, a trusted brand with more than 35 years in the solar industry. SunPower is known for delivering high quality, innovative solar products and making it simple for its customers to switch to renewable energy.

What is the IKEA and SunPower home solar partnership?

Through this collaboration, members of the IKEA Family customer loyalty program will be able to purchase home solar solutions, available through SunPower, to generate and store their own renewable energy and live more sustainably. Home Solar with IKEA is expected to launch in select California markets in Fall 2022.

Does IKEA believe the future is renewable?

"We believe that the future is renewable." Over the last decade, Ikea's parent company has invested around \$2.7 billion in renewable energy.

Does IKEA provide local solutions?

To ensure this happens, IKEA will provide local solutions, such as bundled framework agreements and Power Purchase Agreements to enable suppliers to purchase renewable electricity from the grid. This, according to IKEA, can cover the electricity demands of the supplier, which cannot be generated on-site.

Does IKEA have a climate footprint?

To speed up the reduction of the climate footprint from production, IKEA has decided to include ten additional markets into the programme to support suppliers to switch to renewable electricity. Almost two-thirds of the IKEA climate footprint is directly connected to the supply chain, including production at suppliers.
