Is Medan a good location for solar energy production?

Medan, North Sumatra, Indonesia is a great location for solar energy production all year round because it receives a consistent amount of sunlight throughout the year.

How much solar power does Medan produce a year?

Seasonal solar PV output for Latitude: 3.5847, Longitude: 98.6629 (Medan, Indonesia), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 5.12kWh/day in Summer.

What angle should solar panels be installed in Medan?

For fixed panel installations in Medan, North Sumatra, tilting your panels at an angle of 3 degrees towards the South will maximize your total yearly production from your solar panels. This is because this angle takes into account the position of the sun in relation to Medan's location near equator.

How many solar PV locations are there in Indonesia?

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 50 locations across Indonesia. This analysis provides insights into each city/location's potential for harnessing solar energy through PV installations. Link: [Solar PV potential in Indonesia by location](#)
