In the commercial sector, businesses have leveraged IES battery storage to enhance their energy resilience and reduce operational costs. A manufacturing plant in Johannesburg integrated IES high voltage batteries into their energy management system.

IES-BATT-215R battery module, featuring 215.04 kWh usable energy capacity, LFP cell technology, and Ethernet/CAN/RS485 communication. With scalability, IP20 protection, and compatibility with various PCS systems, it offers versatile energy storage solutions for on-grid, off-grid, and backup applications.

The energy storage system consists of battery, battery management system, energy management system, combiner cabinet, bidirectional converter, lighting system, fire alarm system, temperature management system, monitoring system, etc. The battery system is connected to the solar storage and charging integrated machine.

IES battery modules are manufactured utilizing the most advanced lithium cell technology and manufacturing methodologies to ensure quality and consistency is never sacrificed. Their diverse production capabilities yields solutions optimized for energy storage applications.

Our cutting-edge solar battery systems are the perfect solution! Designed to be reliable, durable, and easy to use, providing you with a hassle-free way to harness the power of renewable energy.
