

Will almm revolutionize the solar industry in India?

With ALMM as a catalyst, India is poised to lead the global solar market, advancing towards Atmanirbhar Bharat. The implementation of ALMM is expected to revolutionize the Indian solar industry, as only manufacturers of solar panels certified by BIS and approved by ALMM will qualify for Open Access and Net Metering Projects.

Is India ready for a massive solar equipment manufacturing ecosystem?

Those are just the beginning of a massive solar equipment manufacturing ecosystem evolving in the country, targeting both the domestic and export markets. In the first half of the year 2024, India added a record 11.3 GW of solar modules and 2 GW of solar cell capacity.

Are Indian PV manufacturers focusing on the export market?

Indian PV manufacturers are increasingly focusing on the export market. Until FY2024, three of the largest domestic PV manufacturers - Waaree Energies, Adani Solar and Vikram Solar - accounted for most of India's PV modules exports. Each company exported more than half of its annual actual production in FY2024.

How many solar modules are there in India?

By the end of June 2024, India's cumulative solar module capacity reached 77.2 GW and solar cell capacity totaled 7.6 GW. Of this, 51 GW of module capacity had received ALMM certification. The top 10 manufacturers accounted for 58% of module capacity and 100% of cell production capacity.

How many solar cells are produced in India in 2024?

In the first half of the year 2024, India added a record 11.3 GW of solar modules and 2 GW of solar cell capacity. With that, the country's cumulative manufacturing capacity reached 77.2 GW in modules and 7.6 GW of cell capacity. Gujarat alone accounts for 45% of module manufacturing and 52% of cell manufacturing.

What is India's solar module manufacturing capacity & production capacity?

The top 10 manufacturers accounted for 58% of module capacity and 100% of cell production capacity. Mercom said India's solar module manufacturing capacity will hit 172 GW and cell capacity to approach 80 GW by 2026. More than 57% of the installed module capacity is geared for M10 and G12 wafer sizes.

4 ???· By mandating the use of solar PV cells from ALMM List II, the government aims to foster a robust domestic solar PV supply chain, reduce the carbon footprint associated with solar module imports, and bolster India's energy security. Thin-film solar modules from integrated manufacturing units will comply with the new requirement.

India's commitment to enhancing its solar energy capacity is a key component of its sustainable development and energy independence strategy. India is well positioned to execute its plans to leverage solar power to meet

a substantial portion of its energy needs by 2032, backed by government initiatives and investment in technology.

India has introduced a series of policy incentives to promote domestic PV manufacturing. Among them, the ALMM mandates that government projects use domestically produced modules listed in the ALMM. For India, where government projects form a significant portion of installations, the ALMM incentivizes local capacity and gradually reduces its reliance ...

Indian PV manufacturers are increasingly focusing on the export market. Until FY2024, three of the largest domestic PV manufacturers - Waaree Energies, Adani Solar and Vikram Solar - accounted for most of India's PV modules exports. Each company exported more than half of its annual actual production in FY2024.

With ALMM as a catalyst, India is poised to lead the global solar market, advancing towards Atmanirbhar Bharat. The implementation of ALMM is expected to revolutionize the Indian solar industry, as only manufacturers of solar panels certified by BIS and approved by ALMM will qualify for Open Access and Net Metering Projects.

4 ???· Utility-scale solar: 13.2 GW -- 160.9% more than in January-September 2023. "This surge can be attributed to the government"s initiative to issue bids for 50 GW of RE capacity ...

The ALMM Order states that ALMM shall consist of LIST-I, specifying models and manufacturers of Solar PV Modules and LIST-II, specifying models and manufacturers of Solar PV Cells. First ALMM List for solar PV modules was issued on 10.03.2021.

Polysilicon, used in solar panel manufacturing, will attract a 50% import duty from 2025. However, the USTR has given tariff exceptions to import solar and wafer-making machinery. That is helping Indian manufacturers. India"s solar exports rose 227% to \$1.8 billion in 2023 from \$561 million in 2022 and the US accounted for over 97% of Indian ...

Founded in 1989, Tata Power Solar, a subsidiary of Tata Power, says it is India"s largest integrated solar company, manufacturing solar cells and modules, rooftop solar panels and solar water pumps. The company provides solar power to 13 state utilities in India, and it has shipped more than 3 gigawatts of solar modules worldwide.

4 ???· Utility-scale solar: 13.2 GW -- 160.9% more than in January-September 2023. "This surge can be attributed to the government"s initiative to issue bids for 50 GW of RE capacity annually over ...

4 ???· By mandating the use of solar PV cells from ALMM List II, the government aims to foster a robust domestic solar PV supply chain, reduce the carbon footprint associated with ...
