

How is India advancing Advanced Energy Solutions?

As the world watches, India is progressing advanced energy solutions rapidly. India is setting ambitious targets for deploying advanced energy solutions such as clean hydrogen, energy storage and carbon capture. By 2030, it plans to invest over \$35 billion annually in these areas.

Will Gautam Adani invest \$100bn in India's energy transition?

Gautam Adani has vowed to invest \$100bn (£78.3bn) in India's energy transition. Its green energy arm is the country's largest renewable energy company, producing nearly 11GW of clean energy through a diverse portfolio of wind and solar projects.

Is Adani a green energy company?

Its green energy arm is the country's largest renewable energy company, producing nearly 11GW of clean energy through a diverse portfolio of wind and solar projects. Adani has a target to scale that to 50GW BY 2030, which will make up nearly 10% of the country's own installed capacity.

How much will India invest in energy storage by 2030?

Based on announced pledges, India is expected to invest more than \$35 billion annually across advanced energy solutions by 2030 (excluding any solar or wind investment). Investment in battery storage alone must reach \$9-10 billion annually. Fast renewable growth drives exponential demand growth for energy storage in India.

Did Adani Green Energy cancel a \$600m bond offering?

When the indictment became public, Adani Green Energy immediately cancelled a \$600m bond offering in the US. France's TotalEnergies, which owns 20% of Adani Green Energy and has a joint venture to develop several renewables projects with the conglomerate, said it will halt fresh capital infusion into the company.

What will India's energy future look like?

According to Jennifer Granholm, US Secretary of Energy, "In so many ways, the world's energy future will depend on India's energy future." In line with this, the country is adopting ambitious goals for deploying solutions such as clean hydrogen, energy storage, carbon capture and sustainable aviation fuels.

Arcon was conceptualized in 2003 by a group of highly talented structural engineers who had mastered the field of extra high voltage power transmission lines. We are centrally located in the city of Nagpur, India providing our services worldwide. Our brand has evolved to ...
