

4 Ingeteam BESS 2025 ? BESS 2024 300 MW 1.5 GW ...

Spain is targeting 20GW of energy storage by 2030. This BESS was deployed by Ingeteam at a green hydrogen facility in Ciudad Real. Image: Ingeteam. The government of Spain, through the Institution for the diversification and energy savings (IDAE) has awarded 880MW/1,809MWh in its first tender for energy storage to be co-located with renewables.

Energy conversion equipment specialist Ingeteam has supplied a battery energy storage system (BESS) for the Puertollano facility in Spain, the world's largest operational green hydrogen plant. The Puertollano renewable ...

Ingeteam is a market leader specializing in electrical engineering and the development of electrical equipment, motors, generators and frequency converters. It deploys its products in four main sectors: Energy, Industry, Marine and Railway traction,

Energy conversion equipment specialist Ingeteam will supply a 70MW/340MWh battery energy storage system (BESS) in northern Italy for a 2023 delivery date. The company, based in Spain but with operations globally, said the BESS will be one of the largest in Europe and the world with a capacity "that was almost unthinkable until recently".

The StringStation has been conceived to enable and optimize the use of Ingeteam's INGECON; SUN STORAGE 350TL inverters, ensuring a perfect connection between the BESS plant and the grid. This turnkey solution is capable of connecting up to 8.4 MW of 1,500 V 3Play inverters to a medium voltage grid. Available worldwide

Ingeteam's Battery Energy Storage Systems (BESS) is a compact battery storage solution controlled by an optimized energy management system that enhances vessel's power plant capabilities. Ingeteam's BESS turns any standard electric propulsion vessel into a latest generation hybrid-electric propulsion vessel.

Besides, it features the same technology as Ingeteam's PV inverters, facilitating the supply of spare parts. Advantages of DC-coupling The main advantage of a DC-coupled system is that the regulatory requirements are lower than the ones needed for an AC-coupled solar-plus-storage system, as there is no need to prepare an interconnection study .
