To maximize your solar PV system's energy output in Santo Domingo Este, Dominican Republic (Lat/Long 18.492, -69.8701) throughout the year, you should tilt your panels at an angle of 17° South for fixed panel installations.

These are times when big companies in the Dominican Republic are investing in solar energy while at the same time they seek governmental restrictions against homeowners installing the systems and a change in the present rules for solar energy. The Ministry of Energy has been listening to the big companies.

Solar Panel Installation: Our technicians are experienced in designing and installing solar panel systems according to the local electricity company's requirements. We assess your property's energy needs and create a customized installation plan that maximizes energy production.

In an attempt to be more self sufficient and rely as little as possible on public services, I am thinking of installing solar panels. Upon speaking about this with my builder he informs me that in order for solar panels to work in DR the electricity must be 24-7 and that it is a requirement by the power company but that he would do more ...
