

French energy major TotalEnergies will build a 1-gigawatt solar power plant in Iraq as part of a cluster of contracts it was awarded in 2021 for an integrated project that entails a total investment of \$27 billion over 30 years.

The project consists of 2 million high-efficiency bifacial solar panels mounted on single-axis trackers. Upon its completion, the array will have a peak generation capacity of up to 1.25 GW, which will be supplied to the electricity grid in the Basra region of Iraq.

The project consists of 2 million high-efficiency bifacial solar panels mounted on single-axis trackers. Upon its completion, the array will have a peak generation capacity of up to 1.25 GW, which will be supplied to the ...
