Introduction to Parameters of Photovoltaic Off-Grid Inverter

Can I use PV inverters in off-grid systems?
You can usethe following PV inverters in off-grid systems. You can order all the listed PV inverters with preset off-grid parameters from SMA Solar Technology AG. The PV inverters must be equipped with at least the firmware version given in the table,or a higher version.

What is an off-grid PV power system?
2. Typical Off-Grid PV Power System Configuration Off-grid PV power systems can range from a single module, single battery system providing energy to dc loads in a small residence to a large system comprising an array totaling hundreds of kW of PV modules with a large battery bank and an inverter (or inverters) providing ac power to the load.

How can I order a PV inverter with preset off-grid parameters?
You can order all the listed PV inverters with preset off-grid parameters from SMA Solar Technology AG. The PV inverters must be equipped with at least the firmware version given in the table, or a higher version. If this is not the case, perform a firmware update (see PV inverter documentation).

Can a PV inverter be set to stand-alone mode?
The PV inverter can be set to stand-alone modeand reduce its feed-in power if this is required by the battery state of charge or the energy demand of the connected loads. To do this,use the integrated frequency-shift power control (FSPC). Selecting the PV Inverter You can use the following PV inverters in off-grid systems.

How does a grid tied PV inverter work?
A typical PV grid tied inverter uses a boost stageto boost the voltage from the PV panel such that the inverter can feed current into the grid. The DC bus of the inverter needs to be higher than the maximum grid voltage. Figure 20 illustrates a typical grid tied PV inverter using the macros present on the solar explorer kit. Figure 20.

What if the SMA PV inverter is not configured for off-grid operation?
If the SMA PV inverter is not configured for off-grid operation ex works,you will need to configure the country data set of the PV inverter to stand-alone mode(see the PV inverter documentation).
