

New Zealand's Tokelau Island has become a pioneer in solar energy by being the first completely solar powered territory on the planet. New Zealand has always been known for its environmentally sound policies, and this will become another feather in its cap. The island is made up of three coral reef atolls.

About Iris Power. Iris Power was founded in 1990 and continues to be a globally recognized as a leader in condition based maintenance. Years of scientific research and practical field experience have yielded sensors and instruments that help professionals like you determine the true condition of large electrical machines, prioritize maintenance to prevent failures and extend the life of ...
