Should you install a solar roof or a ground-mounted solar panel?

If you have limited space and low investment cost, solar rooftop panels are great to install. On the other hand, ground-mounted solar panels are best for people who have more space and want more environmental benefits. However, going solar should be everyone's priority to make a healthier and greener future.

When should solar panels be installed?

Rooftop solar panels must be installed only after ensuring enough rooftop space. Ensure an unshaded, south-, east- or west-facing rooftop to ensure maximum sunlight exposure throughout the day. Solar panels' energy production depends on their positioning and alignment on your roof.

Are rooftop solar panels safe?

Being mounted on the roof, they are safely out of reach for vandalism or theft. Cons: Rooftop solar panels cannot be integrated with just any rooftop and require an unshaded, south-facing roof for optimal performance. Despite being economical, the upfront cost of installing rooftop solar panels is still high.
