

# Is there a subsidy for solar power generation equipment

What is the Federal residential solar energy credit?

The federal residential solar energy credit is a tax credit that can be claimed on federal income taxes for a percentage of the cost of a solar PV system paid for by the taxpayer. (Other types of renewable energy are also eligible for similar credits but are beyond the scope of this guidance.)

Will EPA grant a solar for all project?

EPA intends the programs funded by the Solar for All competition to fund projects. Entities with projects should wait for EPA to award Solar for All grants to programs next year and engage with the Solar for All grantees for financial assistance.

Are mobile solar generator programs eligible for solar for all?

Yes, mobile solar generator programs enabling low-income and disadvantaged communities to deploy and benefit from distributed residential solar are eligible to apply to Solar for All.

Can I get a tax credit for solar energy?

There are two tax credits available for businesses and other entities like nonprofits and local and tribal governments that purchase solar energy systems (see the Homeowner's Guide to the Federal Tax Credit for Solar Photovoltaics for information for individuals):

Are financial products eligible under solar for all?

Yes, providing financial products to communities and businesses to enable low-income and disadvantaged communities to deploy and benefit from distributed residential solar is an eligible activity under Solar for All. These financial products would be classified as project-deployment technical assistance for the purposes of this program.

What is a solar for all grant?

Grantees must use all Solar for All program funds to enable communities that fall within the scope of EPA's definition of low-income and disadvantaged communities to deploy and benefit from residential distributed solar.

In the East African Community there is an import duty and VAT (value added tax) exemption on certain solar products. Acting as an indirect government subsidy for solar-powered electricity generation equipment, the regulation ensures that ...

A solar power plant might generate up to 6 units in a day in sunny weather and as less as 1 unit on rainy days. Thus, it is difficult to approximate the exact generation of a solar power plant. ...
