

As part of our Sustainable September campaign, we are thrilled to spotlight Manx Solar Electrical Ltd, a business dedicated to helping the Island reduce its carbon footprint through renewable energy solutions. From solar panels to heat pumps and battery storage, Manx Solar Electrical is driving innovation in renewable technology.

When investigating solar panels there are many questions: how many panels can my roof take? what will they look like? the price? how much power generated? yearly returns? go green use technology to help answer these questions as accurately as possible.

Planning permission is being sought to put the solar panels in seven sets of 100. The roof would be made of sheet metal, bonded to insulation, which allows solar panels to be installed more easily than if it was on traditional slate. The application is currently pending consideration and can be found [here](#).
