

Who is Isle of Man Solar?

Isle of Man Solar is a renewable energy company offering state-of-the-art solar solutions and certified and approved installation services for many products on our website. Our fully compliant engineers will carry out all the work. With Renewable energy what's to come is looking brilliant. Looking to upgrade your energy systems?

Where does the Isle of Man get its electricity?

Most of the Isle of Man's electricity is generated at a gas-fired power station in Douglas. Manx Utilities (MU) has announced that electricity prices on the island are to rise by 30%. The increase will be applied in two increments of 15%, one in April and then one in July.

Why should you go green on the Isle of Man?

go green promote clean energy technologies on The Isle of Man. Reduce your environmental impact, one carbon-footprint at a time. Air Source Heat Pumps (ASHP). At a price which does not cost the earth, go green today.

Is it time to install solar panels in the Manx?

Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity). There is something very satisfying about receiving an energy bill from Manx Utilities which is not only zero, they might pay you because of excess energy sold to the grid. There has never been a better time to install solar.

What is the Manx Energy Advice Centre?

The Manx Energy Advice Centre is an independent charity which has been created as a service to promote energy conservation, the use of renewable energy and provide independent advice and information.

Energy Efficiency Advice Demonstrations include solar panels (both PV to generate electricity and evacuated tubes to generate hot water), best practice in such areas as draught proofing, low energy appliances, double glazing, etc.

Solar energy offers a priceless opportunity for the Isle of Man to reduce its carbon footprint and achieve energy independence. With the government's ambitious plans to decarbonise its electricity supply by 2030, solar energy is at the forefront of this green revolution.

Manx Solar Electrical Ltd is a business dedicated to helping the Island reduce its carbon footprint through renewable energy solutions. From solar panels to heat pumps and battery storage, Manx Solar Electrical is driving innovation in renewable technology.

Solar PV Panels, EV Chargers for your Electric Car, Home Battery Storage, Air Source Heat Pumps (ASHP). At a price which does not cost the earth, go green today. Save Money with Green Technologies

When investigating solar panels there are many questions: how many panels can my roof take? what will they look like? the price? how much power generated? yearly returns? go green use ...

Many properties in the Isle of Man are suitable for solar PV installations and you would be surprised how much energy you can produce. Click on the pictures below and you can see how much energy the two systems generate right now!

Solar energy offers a priceless opportunity for the Isle of Man to reduce its carbon footprint and achieve energy independence. With the government's ambitious plans to decarbonise its ...

Our transition to renewable energy will involve a mix of generation including solar, onshore wind, interconnectors, and local carbon neutral on demand generation. This diverse mix of generation involves solar as part of our plans.

When investigating solar panels there are many questions: how many panels can my roof take? what will they look like? the price? how much power generated? yearly returns? go green use technology to help answer these questions as accurately as possible. Contact us for a no obligation quote.

Harness clean energy for your Isle of Man property with Manx Eco Installations. We specialize in solar panel and air source heat pump installations, delivering sustainable solutions for your energy needs.

At Nexiom Ltd, we are experts in the installation of renewable energy on the Isle of Man, including solar photovoltaic panels (Solar PV), which can be used to power your home, leading to savings on your electricity bills and reducing your carbon footprint.
