

ISO standards play a vital role in supporting SDG 7 by addressing key aspects of energy production, distribution, and consumption. Our standards help organizations and communities improve energy efficiency, accelerate the adoption of renewable energy technologies, and implement effective energy management practices.

Op donderdag 19 september organiseerden wij, ISOenergy, met veel trots het Zeeuws Isolatie Event, speciaal voor onze zakelijke relaties. Op een zonovergoten dag verwelkomden we onze partners om hen bij te praten over ...

Maldives: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas ...

Implementing the ISO 50001:2018 standard can cause cumulative energy savings of 62 exajoules by 2030, which in turn can save up to \$600 bn in energy costs and about 6500 Mt of CO2 emissions. Thus, apart from affecting the environment positively, ISO 50001 certification can be greatly helpful for the finances of your organization.

Developing an Energy Management System. ISO 50001 is based on the management system model of continual improvement also used for other well-known standards such as ISO 9001 or ISO 14001. This makes it easier for organizations to integrate energy management into their overall efforts to improve quality and environmental management.
