

Do Oku panels use a lot of energy?

OKU panels require lower pump powers hence if you're changing your system over to OKU panels from strips, your existing pump may use more energy than is required. If you're purchasing a new pump make sure it's specifically suited for solar pool heating systems, as pool filter pumps are geared differently.

Why should you choose Oku's solar panels?

OKU's solar panels, made of high density polyethylene, offer the right foundation for operating such installations. low pressure loss, high efficiency, non-corroding resistant to swimming pool water absolutely frost-proof, produced in one piece resistant to animal bite marks supports human weight simple to install - modular system

What is Oku's solar heating?

OKU's solar panels are especially designed for this application. This is what OKU's solar heating provides: maximum efficiency and the right temperature for your swimming-pool. Enjoy a warm and comfortable pool temperature with OKU's solar heating.

How does solar heating work with Oku absorbers?

Solar heating for swimming pools with OKU-Absorbers normally will be operated with a direct circuit. The water from the pool will be pumped directly through the absorbers. The use of a heat exchanger is not necessary. This configuration can usually be selected if the absorbers are not to be set up higher than 6 m above the surface of the water.

How do I sizing my Oku panels?

To sum up OKU panels have the best possible cold weather performance *and sizing should be based on collector performance in the shoulder months, hence our recommendation when replacing a PVC tube system is to use 2/3rds the area of your old rubber collector mat system. When sizing a new system use the guide described below.

Are Oku panels good for extending your swimming season?

OKU panels were originally designed for the cooler German climate and are optimized to perform in these shoulder months. As such they typically require much less area than traditional rubber mat systems to effectively extend your swimming season since it's really the performance in the shoulder months that matters most for extending your season.

Recommended panel area in % of pool surface for open-air pools with cover or indoor swimming-pools (early May through end of September). Temperature increase 4-7°C compared to unheated swimming-pools.

OKU solar panel 1000 De zonnepanelen zijn vervaardigd uit hoogwaardige kwaliteit PE en hierdoor geschikt

voor permanente installatie. Het probleem is bekend. Een buitenbad dat niet verwarmd wordt, is in de zomer slechts 3-4 weken per jaar comfortabel warm. Zeer kort als je denkt aan het werk en investeringen die hiervoor gemaakt zijn. Een binnenbad [...]
