5 ???· US-Chinese rivalry is heating up in Ivory Coast, especially when it comes to the country's strategic data centres. The US firm Cybastion gained the upper hand recently when it was selected by Abidjan to manage Ivory Coast's national storage infrastructure.. The American company, led by engineer Thierry Wandji Ketchiozo, pipped China's Huawei to the post.

Meanwhile, the Ivory Coast inaugurated the 37.5 MW Boundiali power plant, which is the first photovoltaic solar plant in the country and the largest in West Africa. "In five years, the share of solar energy will be 9%," stated the Prime Minister of Ivory Coast, Robert Beugré Mambé, during the power plant inauguration on April 24.

The integration of emerging smart cities technology in Ivory Coast marks a transformative shift towards sustainable urban development and improved citizen well-being. As Ivory Coast continues to leverage these innovations, it effectively addresses urban challenges while fostering economic prosperity and enhancing the overall urban living ...

Ivory Coast plans to increase renewable energy to 42% of its total energy by 2030. The government is working on multiple solar and biomass projects to enhance energy production. Hydropower remains a major source of energy, with several large dams in operation. Efforts are underway to improve electricity access, especially in rural areas.

With a target of increasing renewable energy in its energy mix to 42% by 2030, the country is on a mission to establish itself as West Africa's energy hub. Through various initiatives and projects, Ivory Coast is harnessing its renewable energy potential to meet its energy needs and reduce greenhouse gas emissions.

AI and smart meters providing mountains of data for operator CIE is a private company that operates the electricity network in Côte d"Ivoire and also acts in an advisory capacity to the government with regard to the sector.
