

What is Holcomb energy systems?

Holcomb Energy Systems is setting a new industry standard in electric power generation. Our core technology, the Holcomb Energy System (HES), is an entirely new source of energy -- using no fuel and putting out zero emissions, it is scalable, silent, and point of use.

Why was Holcomb energy systems showcased at the new energy technology conference?

Thrilled to have virtually showcased Holcomb Energy Systems at the New Energy Technology conference in Zurich, Switzerland. With over 300 participants gathered at the auditorium, it was an honor for us to share our innovation on such a significant platform.

Where can the Holcomb energy system be deployed?

The Holcomb Energy System can be deployed in areas where no electrical grid infrastructure exists. One in five people worldwide are living with no electricity and millions more have just intermittent access. We can make rural electrification accessible, affordable and 100% clean.

The Holcomb Energy System eliminates the need for centrally generated power plants and instead places energy production right where it is being used - in homes, commercial buildings, transportation, consumer electronics and along the grid.

Holcomb Energy Systems is a research and development company focused on innovative clean energy technology within the energy sector. The company offers a new energy system, the Holcomb Energy System (HES), which generates electricity without fuel, emissions, or noise, and is scalable for various applications.

The Holcomb Energy System can be deployed in substations or anywhere along the grid to boost transmission. Since it is computer actuated, it automatically reads the grid, boosting power where it's needed, backing off where it's not.

Holcomb Energy Systems is setting a new industry standard in electric power generation. Our core technology, the Holcomb Energy System (HES), is an entirely new source of energy -- using no fuel and putting out zero emissions, it is scalable, silent, and point of use.

With decades of experience across the medical, scientific, and energy industries, Dr. Holcomb is a pioneer in modern invention with hundreds of patents across a range of industries, from ...

Astra Energy Inc. is an integrated solutions provider investing in and developing renewable and clean energy projects in markets where demand is high, supply is limited and there is an opportunity to address other imminent market needs.

Using this principle, the Holcomb Energy System harnesses and magnifies the electrical energy input up to 500 percent, meaning that we now can produce clean, plentiful, renewable energy...
