

How much does a Jinko Solar System cost?

Jinko has multiple manufacturing facilities globally, including in the United States. The Jacksonville, Florida, location has been producing solar panels since 2018. A solar energy system built with Jinko solar panels typically costs around \$2.60 per watt. That means a 6 kilowatt (kW) Jinko system will cost you about \$16,000 before incentives.

Why should you choose JinkoSolar solar panels?

As you begin the process of selecting solar panels, insist on reliable, performance-proven EAGLE® Modules and EAGLE® Storage from JinkoSolar. Home and business owners add solar and energy storage to save on electricity bills, cut operating costs, and lock in energy rates.

Is Jinko Solar a good company?

The company has also been rated 100% recognized and bankable by respondents to a Bloomberg survey sent to banks, construction companies, and utilities. Backed by advanced R&D, JinkoSolar offers an assortment of panels to suit your needs from sleek, all-black, ultra-powerful panels to more cost-effective models.

What is Jinko Solar all-in-one?

Jinko Solar All-in-One is a compact single-phase storage solution which integrates LFP battery, BMS, hybrid inverter, UPS, smart monitoring system and enclosure. The system seamlessly blends power performance with a slim and elegant design, which can be combined with any Jinko Solar module.

Are Jinko Solar panels ethical?

Jinko is not only a best-selling solar brand with the panels most trusted by utilities, but we're also ensuring that our processes are as clean as our product's output. So, while we create state of the art EAGLE® solar panels and energy storage solutions to power future decades, we're doing it in an ethical, cleaner way. You have choices.

What does a Jinko Solar System include?

Features roof mounted panels, inverter (or several micro inverters), a power meter, and batteries. JinkoSolar has been a top performer in the industry's most respected third-party lab test for nine consecutive years.
