Today, about 70 percent of Kazakhstan's energy sector is based on coal; hydropower and gas are at around 27 to 28 percent; and renewable energy comes in at just 2 percent. Given Kazakhstan's heavy reliance on fossil fuels, transitioning to renewable energy represents a major shift.

OverviewCurrent statusHydro renewable energySolar energyWind energyBioenergyBarriers to renewable energyRenewable energy projectsThere is enormous potential for renewable energy in Kazakhstan, particularly from wind and small hydropower plants. The Republic of Kazakhstan has the potential to generate 10 times as much power as it currently needs from wind energy alone. But renewable energy accounts for just 0.6 percent of all power installations. Of that, 95 percent comes from small hydropower projects. The main barriers to investment in renewable energy are relatively high financing costs and an abse...
