

Kosovo's potential for generating energy from renewable sources, more specifically from photovoltaic systems, are significant and very important in protecting the environment. Kosovo's...

Supported the development of the National Energy Strategy, which Kosovo's Assembly passed in March 2023. Competitively solicited 100 megawatts of solar energy through the launch of Kosovo's first ever renewable energy auction. Developed a framework for reduced commercial losses at electricity utilities in Kosovo's northern municipalities.

By increasing the share and capacity of solar energy in power generation, the project will contribute to energy supply security, a faster green transition and economic growth in the region. Upon completion, the plant is ...

USAID has contributed to the approval of Kosovo's ten-year National Energy Strategy, which aims to increase Kosovo's renewable energy generation targets from 5% to a very ambitious 35%, reduce emissions by 25%, and phase ...

By increasing the share and capacity of solar energy in power generation, the project will contribute to energy supply security, a faster green transition and economic growth in the region. Upon completion, the plant is expected to produce around 169 GWh of electricity and displace 174 000 tonnes of CO2 a year on average.

The U.S. government works closely to support Kosovo's transition by enhancing regional market integration, building resilience in the energy sector, and promoting transparent investment in renewable energy projects. Kosovo has previously offered feed-in tariffs for a quota of renewable energy projects, which has been fulfilled.

Kosovo's recent Energy Strategy sets an ambitious vision to achieving a just energy transition for the country between 2022-2031. The main pillar of the Strategy is to accelerate renewable deployment, focused on utility-scale wind and solar PV. Kosovo plans to integrate 1200 MW of RES over the next 10-years. 100 MW Solar E n g i n e e r i n g, P ...

Kosovo's green agenda goes beyond promoting climate-friendly practices; it is a plan that aims to grow the economy, strengthen energy security, mitigate climate change, and create local jobs in Kosovo. USAID supports the Government's efforts to implement this green agenda in multiple ways.

The World Bank is working with the government of Kosovo to implement the Kosovo Energy Efficiency and Renewable Energy Project, a \$31 million project designed to reduce energy consumption and fossil fuel use in ...

The Government of Kosovo's draft Energy Strategy prioritizes an ambitious vision for a just energy transition for the country between 2022-31. The Government of Kosovo envisions using market-based solutions, in the form of competitive auctions, to deliver new, renewable energy at affordable prices.

The World Bank is working with the government of Kosovo to implement the Kosovo Energy Efficiency and Renewable Energy Project, a \$31 million project designed to reduce energy consumption and fossil fuel use in public buildings through energy efficiency and renewable energy investments.

Kosovo's recent Energy Strategy sets an ambitious vision to achieving a just energy transition for the country between 2022-2031. The main pillar of the Strategy is to accelerate renewable ...

Kosovo's green agenda goes beyond promoting climate-friendly practices; it is a plan that aims to grow the economy, strengthen energy security, mitigate climate change, and create local jobs in Kosovo. USAID supports the ...
