

Why is Kuwait important to the EU?

It also provides for sectoral consultations in the fields of energy (including clean and renewable energy), security and counter-terrorism, development cooperation and other areas of mutual interest. Among the top Arab donors, Kuwait is also an important ally of the EU in the humanitarian field.

What is Kuwait Energy Outlook?

The platform came in the form of Kuwait Energy Outlook, an energy policy platform supporting efficient coordination between the energy sector stakeholders that assures coordination and robust development among them to realize the country's domestic and international responsibilities operated and managed by national capacities.

How much energy does Kuwait use?

Kuwaiti citizens account for 30% of the total population, but they use about two-thirds of the total amount of energy consumed in the country. Average temperatures hover in the upper 40s Celsius during summer months. Over the past few years, these "summer" months have extended from April to October.

Is Kuwait facing a changing energy world?

Kuwait, like all oil-producing countries, is facing a changing energy world today. Shifting supply, demand and technology trends have ushered in an energy world where oil-price volatility and market uncertainty are the defining features.

Is Kuwait a natural gas exporter or importer?

Today, Kuwait relies almost exclusively on oil products and natural gas to meet its energy needs, with each fuel accounting for about a half of total primary energy consumption. But while Kuwait is a major oil exporter, it is a net importer of liquefied natural gas, due to underdevelopment of its gas reserves.

What are the economic ties between the EU and Kuwait?

Economic ties between the EU and Kuwait are also an important focus of the bilateral relationship as the EU is the third trade partner for Kuwait (2018 statistics). The two sides are engaged in regular dialogue on trade and investment and macroeconomic issues under the GCC framework. The first EU-GCC business forum was held in Kuwait in March 2019.

The sources revealed that Kuwait increased its exports of fuel oil, diesel, and jet fuel to Europe by five times in the past months. This increase aims to aid European engines and somewhat compensate for the Russian supply deficit, which the European Union faces following its decision to ban the import of refined petroleum materials from Russia.

The event held at the EPA premises on 26 June 2024 brought together distinguished speakers from the

European Union and Kuwait, and many participants including leading industry experts, policymakers, diplomats, researchers and business representatives, allowing for an insightful exchange on ways to
